Project №1446
Investments in Trading with hedging in the form of mining

The author of the project has his own analytical and consulting trading company with 10 years of experience. In addition to trading, for more than 7 years, there are more than 5,000 equipment under management on mining farms in Kazakhstan, South Korea and Uzbekistan. High, and most importantly, stable profits are achieved thanks to extensive experience, a well-thought-out strategy and competent capital and risk management. Even in case of unsuccessful trades, the loss is hedged due to mining power. When trading, the investor invests money exclusively in his account, while fully controlling the input and output of funds, which is a guarantee of return of funds.

Project implementation period after attracting investments: **1 month.**

Required income data: 400 000$:

Name	Price, $	Quantity, pcs	Amount, $
Trading	300 000	-	300 000
ASIC miner updates	8 000	10	80 000
Other expenses	20 000	-	20 000
TOTAL:			**400 000**

Profit table for calculations: 1 kWh = 0,05$, 1BTC = 25 000$

Monthly income data:

Name	Amount, % of investments	Amount, $
Trading in the crypto asset market	12	48 000
TOTAL:		**48 000**

Monthly expenses data:

Name	Amount, $
Providing software and salaries of employees	3 000
TOTAL:	**3 000**

- **Annual income**: 48 000$*12 mo. = **576 000$**
- **Annual expenses**: 3 000$*12 mo. = **36 000$**
- **Net profit per year**: 576 000$ – 36 000$ = **540 000$**
- **Profitability of investment capital**:

$$\textbf{ROI} = \frac{\text{Net profit}}{\text{Investment amount}} \times \text{Investor's Share} * \textbf{100\%} = \textbf{81\%}$$

Distribution of shares:
60% - the investor and **40%** - the project author before the full return of the investment,
45% - the investor and **55%** - the project author after the full return of the invested funds.
