Location: UAE
Description: The founder of the project plans to expand the container logistics business.

The UAE is one of the largest logistics hubs in the world. Due to its geographical location, the UAE serves as an important transit point for freight transport between Asia, Europe, Africa and other regions. As a result, a favorable climate is created for investors from all over the world. In 2020 alone, UAE ports handled **more than 20 million** TEU (20-foot container equivalent units). The container logistics market is valued at hundreds of billions of dollars and continues to grow every year.

The demand for this market segment is growing from year to year; it is a stable and safe business that reliably brings profit to those who engage in it. In this unique case, the investor avoids all the difficulties associated with delicate logistics work.

The investor is offered to invest in containers; they will be temporarily managed by Founder's company, which has been on the market for **more than 20 years** and produces thousands of transactions per month. More than **$37 million** has already been invested in the company, and its financial indicators exceed a billion dollars.

A notable feature of this transaction is that all the investor's containers will be on his balance sheet.

Global Invest

Protected investments in highly profitable projects

An investor can become part of this huge business without plunging headlong into it and receive a stable profit of **25% per annum** from the amount of his investment, which on average increases by **5%-25%** each subsequent year.

Required amount of investment: from 300 000 $

NAME	AMOUNT, $
Purchase of containers (192 pcs.)	300 000
Total	**300 000**
