PROJECT №1607
TRADE OF NATURAL URANIUM

REQUIRED AMOUNT OF INVESTMENTS:
$5 500 000 - 100 000 000

RETURN ON INVESTMENT CAPITAL:
30%

Our social networks

Description: The main activity of Founder's company is concentrated in the trade of natural uranium and metals in the UAE. Natural uranium ore (U308) is purchased on the open market from miners and traders, processed in third-party plants and then sold to end users - utilities, investors, and other traders. Trading uranium is subject to strict regulations and requires special licenses and permits, which Founder's company has.

U3O8 is the most affordable product of the nuclear fuel cycle with a spot market volume of **$5 billion**. According to the International Atomic Energy Agency, in 2020 the demand for uranium for use in nuclear reactors was about **79 thousand tons.** uranium in U3O8 equivalent. The demand for uranium is expected to reach **119 thousand tons** by 2030. in year. By 2030, a significant supply shortage is projected due to underinvestment in exploration in recent years. Today's price levels are at rock bottom, and prices are projected to rise over the next few years.

The investor is invited to invest in uranium trading with the help of Founder's company, which has been trading for several years, has the necessary qualifications and experience, as well as the necessary permits to carry out such activities.

Global Invest

Protected investments in highly profitable projects

The main specialization is the spot market, contracts for up to 1 year. More than 50% of transactions in the spot market are carried out by traders and funds/investors. All trading operations are carried out without physical movement of uranium, i.e. Export-import control procedures are not applicable and there are no transport risks.

Required amount of investments: from $5 500 000 to $100 000 000

Data on income for the year: about 3 transactions are made per year with an average profitability of 10%

- Annual income with an investment amount of $10 000 000: $3 000 000
- Return on investment capital for an investment amount of $10 000 000: **30%**

$$\textbf{ROI} = \frac{\text{Net profit}}{\text{Investment amount}} \text{ x Investor's share x 100\% = } \textbf{30\%}$$
