TRADING OF ELECTRIC CARGO TRICYCLES

REQUIRED AMOUNT OF INVESTMENTS:
$183 800

ANNUAL NET PROFIT:
$650 400

RETURN ON INVESTMENT CAPITAL:
213%

FOUNDER'S INVESTMENT:
$7 000

Our social networks

Description: The main activity will be retail and wholesale trade in electric cargo three-wheelers. The product is widely used in the fields of agriculture, construction, logistics and self-employment. At the initial stage, it is planned to purchase 170 pieces. (2 containers) with an interval of 2 weeks for uninterrupted sales.

At this stage, a market analysis has been carried out, premises for rent have been found, all personnel have been trained and prepared, logistics to the point of sale have been thought out, the terms of purchase and sale have been agreed upon with the GET manufacturer, and there is a customer base.

The founder contributed **$7 000** for operating expenses.

The goods will be sold to the cities of the Fergana Valley through a representative store in Kokand, and later also to other regions of Uzbekistan. The main target audience is legal entities. Sales to this segment will be around 85%. The remaining 15% may come from individuals.

Project advantage:
The difference between our product is in its technical component, namely, we offer a more advanced model of tricycles at a price lower than that of competitors. At the same time, we have already collected a "hot" customer base awaiting the delivery of the product.
