Description: Industry: Finance, investing in projects

Project stage: Existing business, expansion of activities

Project description: Founder's group of companies, which has been operating for 10 years, occupies a significant position in several industries of the country, including insurance, construction and other areas. In a relatively short period of time, specialists and professionals have allowed Founder companies to achieve success in the activities covered. Analyzing the prospects and future market structure, it was decided that expansion is necessary in the next five years, so various financing options are currently being considered for future projects, one of which is foreign investment with benefits for the investor.

Market need: In Uzbekistan, due to a lack of funding, there is a huge number of unrealized projects with potentially high profitability. There are very few companies that are ready to take responsibility for control over the project and invest in it.
