Description: The founder plans to organize a workshop for the production of vegetable oil using imported equipment and raw materials. The estimated volume is 600 tons per month. The founder invested **$500,000** for the purchase and renovation of premises, studying the sales market, establishing contacts with the equipment manufacturer and planning the implementation of the project. Sales of goods are aimed at the Uzbekistan market with the prospect of export abroad. The unique technology of cold pressing from high-quality raw materials will ensure that the product is in demand on the domestic market, and the geographical location within the city will allow saving on logistics costs. After 3 months after the investment, you can expect the shipment and complete installation of equipment in the workshop, ready for production.
