Description: The founder plans to expand the activities of the rice processing workshop in the city of Kokand in order to increase production volume to 150 tons of rice per month. The products will be supplied to all local markets throughout Uzbekistan in packages weighing 25 kilograms and 0.9 kilograms. Currently, the processing volume is 15 tons per month.

Today, there are two competitors in the Uzbekistan market, specializing in the supply of rice in special packaging: the "365 kun" and "UzRice" trademarks.

The project has a number of advantages:

- Ensuring high quality products while maintaining competitive prices.
- Guaranteed long shelf life of products.
- Effective protection against insect pests
- Availability of a permanent reserve fund to ensure production stability.
- The founder has more than 16 years of experience in the field of rice cultivation, backed by a qualified team of specialists.

The project implementation period after attracting investments is 6 months.

The founder invested $40,000 in the following:

- Land plot for installation of technological equipment
- Brand store
- Damas car
- Marketing
- Patenting a trademark
