Description: The project involves working with franchises of official dealer companies and is engaged in glass production.

Current Project Status:
All the companies belong to a single holding — a successful group of 12 companies with an annual **turnover of approximately $50 million.**

Sales are concentrated in the regions of Andijan, Fergana, and Namangan, with plans to expand into export markets. The project's unique advantage is that the company is the sole official supplier of a very well-known product in the region.

The project includes several companies offering different products, so prices vary. The investment amount can be utilized within 3 months, generating a profit of 7–8%.

More than **$4 million** has already been invested in the project.
